Data Analyst

Karachi, Pakistan | iqrahabib799@gmail.com | +92 3215261470 | [linkedin.com/in/iqrahabib](https://www.linkedin.com/in/iqrahabib) | github.com/iqraghori

PROFESSIONAL SUMMARY

Final-year Software Engineering student at the University of Karachi with hands-on experience in Python-based data analysis, API data collection, feature engineering, and end-to-end EDA. Completed 500+ hours of the CampusX Data Science Mentorship Program and NVIDIA-certified in Deep Learning fundamentals. Seeking a Data Analyst internship or entry-level role to apply analytical skills on real business problems.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Feature Engineering, EDA, Weighted Scoring (IMDb formula)

Visualization: Matplotlib, Seaborn, Advanced Data Visualization (multi-variate plots, correlation heatmaps, distribution analysis)

Tools: Jupyter Notebook, VS Code, Git, GitHub, REST APIs, JSON, Google Colab

Concepts: Statistics, Correlation Analysis, OOP, Data Structures, Problem Solving

PROJECTS

TMDB Movie Data Analysis: *Python, Pandas, NumPy, Matplotlib, Seaborn, REST API, JSON* | [GitHub](#)

- Collected 10,000+ movie records via TMDB REST API using paginated requests; parsed nested JSON and structured data into a clean Pandas DataFrame for analysis
- Applied IMDb-style weighted rating formula to engineer a fair ranking metric, replacing raw vote averages with a credibility-adjusted score
- Performed multi-dimensional feature engineering: extracted release decade, binned budget and popularity tiers with `pd.cut()`, and computed genre-level aggregates
- Built advanced visualizations including correlation heatmaps, genre popularity distributions, budget-vs-revenue scatter plots, and decade-level trend charts using Matplotlib and Seaborn

Student Performance Analysis: *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Cleaned and analyzed a 1,000+ row dataset to identify performance drivers including attendance patterns and subject scores
- Surfaced insights across grade levels using groupby aggregations and statistical summaries; visualized findings with heatmaps and boxplots

Real-Time Weather Data Pipeline: *Python, REST API, JSON*

- Fetches live weather data via public REST API, parses nested JSON responses, and structures output into a clean DataFrame for analysis

EDUCATION

Bachelor of Science in Software Engineering • University of Karachi, Karachi, Pakistan • *Expected 2026*

CERTIFICATIONS

Fundamentals of Deep Learning — NVIDIA Deep Learning Institute (DLI), 2025

Speed Debugging Competition — DataCamp

ACTIVITIES & ACHIEVEMENTS

- **Managed community Instagram page (1K+ followers), increased engagement by 20% through consistent content strategists** UoK
- **Applied problem-solving and coding skills in a competitive programming environment** **DEN** Coding Cup 2024
